

## The Star Gazette

### https://SkokieValleyAstronomers.org/

### Always check the Meetings page of the website for the latest information!

Our next meeting, **Friday, April 12, 2024, 7:30 PM**, will be hybrid: online via Zoom and in-person at the Glenview Public Library, 1930 Glenview Rd, Glenview, IL, 60025, in the Community Room East on the first floor. Free parking is available. Please check the website Meetings page for the latest information and Zoom link.

The April 8th, 2024 total solar eclipse is the last one that can be seen from the contiguous 48 United States until August 23, 2044, so observing this one is important! Of course, observing is always at the mercy of travel and weather problems, so good results can never be guaranteed. In this meeting, **the Membership** (and anyone who attends) will either declare their triumphs or lament their tragedies. Attendees are encouraged to bring photos, stories, and snacks!

#### The April 8th Solar Eclipse: Observing Triumphs and Tragedies

Skokie Valley Astronomer club dues are \$30 per year, which runs from April to March. Please check your mailing label. Does it say "member through March 2025"? If not, please consider becoming a member.

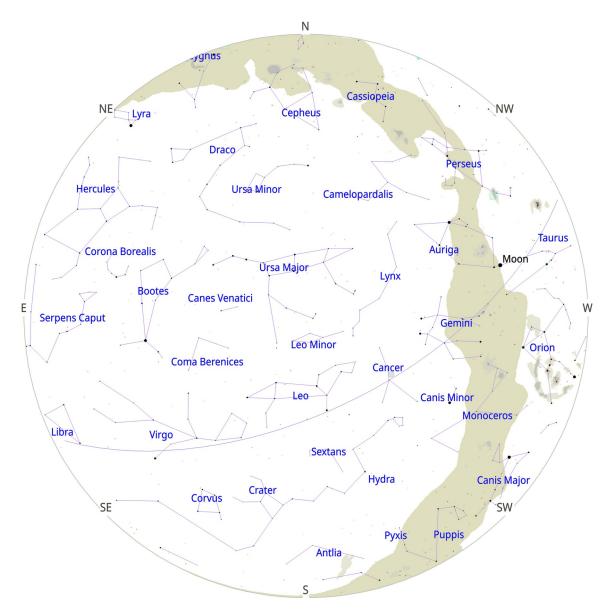

2024			Moon Elongation						
Date	Talk	Speaker	and Phase .						
May 10	An Autumn Skies Comet	Michelle Nichols	38°E – New Moon						
Comet C/2023 A3 (Tsuchinshan-ATLAS) will visit our neighborhood in the solar system in September-October 2024. It									
may become bright enough to be seen with the naked eye – possibly even a fairly bright comet. Michelle Nichols, Director									
of Public Observing at the Adler Planetarium, will talk about what we know about it, when to view it, and what to expect									
from it (or not) in our late October evenings.									

# July 12 Capturing the Stars: Andrea Twiss-Brooks 81°E – First Quarter The Untold History of Women at Yerkes Observatory

Women contributed to the advancement of astronomy and astrophysics at Yerkes Observatory in the early twentieth century. Women were not only calculators or assistants; they earned degrees, conducted their own research, collaborated on projects with peers of both sexes, worked on publications, and used their time at Yerkes to launch a wide range of careers. Their lives and labor are all but invisible in public records, but their contributions to science—and their voices—are preserved in archival collections studied by an interdisciplinary team at the University of Chicago. In this presentation, Andrea Twiss-Brooks, Director of Humanities and Area Studies at the University of Chicago Library will explore the scientific work and the lived experiences of women who contributed to the advancement of astronomy and astrophysics in early twentieth century America.

# October 11 Wonders of Webb: Jim Kovac 106°E – First Quarter Exploring the Universe with JWST

Following the successful launch and deployment of the James Webb Space Telescope, astronomers have explored new vistas and aspects of the Universe made possible with this remarkable instrument. Club member Jim Kovac will lead an exploration with this new eye on the Universe.
